Technical Reference Specification - Cloud Platform v4.2

1. Availability & Disaster Recovery SLA
Target monthly platform availability is 99.5% excluding scheduled maintenance.
Disaster recovery replication is asynchronous with a 4-hour RPO target.

2. Security & Cryptography Standards
All persistent volumes use AES-256 encryption at rest and TLS 1.3 in transit.
Data centers maintain active ISO 27001 and SOC 2 Type II certifications.

3. Support Operations & Implementation Timeline

Standard enterprise support operates during business hours (Mon-Fri 09:00-18:00 UTC)
with a 4-hour P1 critical incident response target.
Standard onboarding and production migration require 12 weeks from kickoff.
